Notes on the Diptera of Somerset.

Part V (*Appendix*).

EDITED BY COLONEL T. JERMYN, F.E.S.

THESE additions to Mr. H. J. Charbonnier's list of Somerset Diptera are largely compiled from the manuscript notes of the late Mr. A. E. Hudd, F.S.A., F.E.S., kindly given to me by Mrs. Hudd. Many of the insects recorded by Mr. Hudd were taken by himself and are noted (H); others by the late Mr. F. Milton (F.M.) and Mr. G. C. Lamb (L). I owe many thanks to Mr. H. J. Charbonnier and to Mr. A. E. J. Carter for additional information regarding Mr. Hudd's Diptera and for other records; to Miss I. M. Roper, F.L.S. (I.M.R.), for the privilege of including in this paper a very interesting descriptive list of Cecidomyid galls and to Mr. H. Audcent (A) for much kind assistance in the compilation of this list as well as for a fine list of records. For notes and specimens of insects taken in the county my thanks are also due to Mr. L. B. Hall, F.L.S. (L.B.H.), Mr. H. H. Slater (S), Capt. R. D. R. Troup (T), Mr. H. Womersley (H.W.), Mr. R. Jermyn (R.J.), and to many other members of the Entomological Section for specimens which, though not appearing here as additions, will be of interest in any future revision of our lists and are valuable additions to my own collection. In Mr. Hall's notes "Minehead" includes the area between Old Cleeve and Culbone. In my own notes (J), Weston-super-Mare includes Worlebury Camp and the Kewstoke Woods.

Cecidomyidae.

This family has been recently revised by Messrs. Bagnall and Harrison whose Preliminary Catalogue (*Trans. Ent. Soc.*,

1917, pp. 346 *et seq.*) has been followed. In view of changes in arrangement and nomenclature, I have included in this list the species already recorded by Mr. Charbonnier.*

**Lasioptera rubi*, Heeger. Sandford Hill, 22.8.16. On *Rubus caesius*, L. Swelling on stem (I.M.R.).

Rhopalomyia millefolii, H.Lw. Keynsham, 2.10.16. On *Achillea Millefolium*, L. Growth on stem like a small bean (I.M.R.).
